

Texas Instruments TI-Nspire CX OS Replacement

Remedies constant restarting of OS.

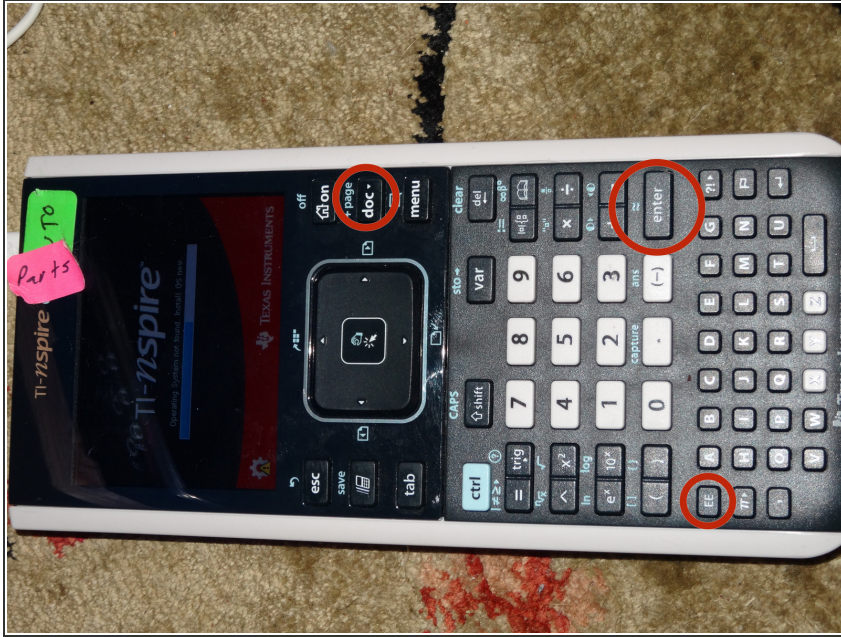

Written By: trogfield

INTRODUCTION

Remedies constant restarting of OS.

Step 1 — OS

- Hold "doc," "enter," and "EE" at the same time, then power the device on.
- Make sure battery is fully charged.
- Restart device by pressing restart.

⚠ Alternatively boot device without battery and hook up to a power source while holding the reset buttons.

⚠ After replace battery warning shows up, connect the battery and do the restart sets again.

Step 2

- Install Ti-Nspire Computer Link Software.
- Download OS from confusing TI website.

⚠ In my case, calculator is now frozen on loading screen, an improvement over restarting.

To reassemble your device, follow these instructions in reverse order.
